**Drone Warfare** Nov 09 2020 Choice Outstanding Academic Title for 2015 One of the most significant and controversial developments in contemporary warfare is the use of unmanned aerial vehicles, commonly referred to as drones. In the last decade, US drone strikes have more than doubled and their deployment is transforming the way wars are fought across the globe. But how did drones claim such an important role in modern military planning? And how are they changing military strategy and the ethics of war and peace? What standards might effectively limit their use? Should there even be a limit? Drone warfare is the first book to engage fully with the political, legal, and ethical dimensions of UAVs. In it, political scientist Sarah Kreps and philosopher John Kaag discuss the extraordinary expansion of drone programs from the Cold War to the present day and their so-called 'effectiveness' in conflict zones. Analysing the political implications of drone technology for foreign and domestic policy as well as public opinion, the authors go on to examine the strategic position of the United States - by far the world's most prolific operator of drones - to argue that US military supremacy could be used to enshrine a new set of international agreements and treaties aimed at controlling the use of UAVs in the future.

**Making the Modern World: Materials and Dematerialization** Jul 26 2019 How much further should the affluent world push the material consumption? Does relative dematerialization lead to absolute decline in demand for materials? These and many other questions are discussed and answered in *Making the Modern World: Materials and Dematerialization*. Over the course of time, the modern world has become dependent on unprecedented flows of materials. Now even the most efficient production processes and the highest practical rates of recycling may not be enough to result in dematerialization rates that would be high enough to negate the rising demand for materials generated by continuing population growth and rising standards of living. This book explores the costs of this dependence and the potential for substantial dematerialization of modern economies. *Making the Modern World: Materials and Dematerialization* considers the principal materials used throughout history, from wood and stone, through to metals, alloys, plastics and silicon, describing their extraction and production.

**Questions of Syntax** May 04 2020 There are far more syntactically distinct languages than we might have thought; yet there are far fewer than there might have been. Questions of Syntax collects sixteen papers authored by Richard S. Kayne, a preeminent theoretical syntactician, who has sought over the course of his career to understand why both these facts are true. With a particular emphasis on comparative syntax, these chapters collectively consider how wide a range of questions the field of syntax can reasonably attempt to ask and then answer. At issue, among other topics, are the relation between syntax and (certain aspects of) semantics, the relation between syntax and what appear to be lexical questions, the relation between syntax and morphology, the relation between syntax and certain aspects of phonology (insofar as silent elements and their properties play a substantial role), and the extent to which comparative syntax can provide new and decisive evidence bearing on these different kinds of questions. To Kayne, comparative syntax can shed light on what may initially seem lexical questions, and antisymmetry on the evolution of human language itself. Taken as a whole, these essays elucidate the theoretical contributions of one of the most influential scholars in linguistics.

**Guatemala, the Question of Genocide** Aug 31 2022 In Guatemala, it was called the "trial of the century": the 2013 prosecution of former de facto head of state (1982-1983) General José Efraín Ríos Montt and his intelligence chief, General José Mauricio Rodríguez Sánchez, on charges of genocide and crimes against humanity against the Maya-Itz'at people. Ríos Montt's seventeen-month reign was one of the bloodiest periods in Guatemala's history, with "scorching earth" massacres, the destruction of hundreds of Maya communities, and militarized resettlement of Mayas into "model villages." Ríos Montt was convicted on all charges. Ten days later, a higher court vacated the verdict on dubious procedural grounds. Nevertheless, Guatemala's genocide trial, held in the domestic courts in the country where the crimes were committed, was precedent-setting. In this volume, Guatemalan and international scholars rigorously explore the complexities of the Guatemala experience and reflect upon the case's implications for understanding and prosecuting the category of genocide more broadly. Topics include: the nexus of racism and counterinsurgency in explaining Guatemala's genocide; the politics of Maya collective memory; the intersections of gender, sexuality, and ethnicity in genocide; the decades-long interconnections of national and transnational justice processes that brought the case to trial; and the limits and contributions of tribunal justice. This book was originally published as a special issue of the Journal of Genocide Research.

**John Prine Jul 30 2022** "An excellent new biography" of the influential songwriter that showcases his renowned humor and musical genius (The Telegraph). With a range that spans the lyrical, heartfelt songs "Angel from Montgomery," "Sam Stone," and "Paradise" to the classic country music parody "You Never Even Called Me by My Name," John Prine is a songwriter's songwriter. Across five decades, he's created critically acclaimed albums—John Prine (one of Rolling Stone's 500 Greatest Albums of All Time), Bruised Orange, The Missing Years—and earned two Grammy Awards, a Lifetime Achievement Award for Songwriting from the Americana Music Association, and induction into the Nashville Songwriters Hall of Fame. His songs have been covered by scores of artists, from Johnny Cash and Miranda Lambert to Bette Midler and 10,000 Maniacs, and influenced everyone from Roger McGuinn to Kacey Musgraves. Hailed in his early years as the "new Dylan," Prine still counts Bob Dylan among his most enthusiastic fans. In John Prine, Eddie Haffman traces the long arc of Prine's musical career, beginning with his early, seemingly effortless successes, which led paradoxically not to stardom but to a rich and varied career writing songs that other people have made famous. He recounts the stories, many of them humorous, behind Prine's best-known songs and discusses all of Prine's albums as he explores the brilliant records and the ill-advised side trips, the underappreciated gems and the hard-earned comebacks that led Prine to find his own successful record label, Oh Boy Records. This thorough, entertaining treatment gives John Prine his due as one of the most influential songwriters of his generation.

**Independence and Accountability of the Higher Indian Judiciary May 16 2021** The Supreme Court of India is a powerful institution at the forefront of public attention in India. It is often engaged in a bitter duel with the government on issues as diverse as the administration of cricket in India to whether liquor shops are allowed on highways. Despite such public prominence, very little attention has been paid to who the judges of the Supreme Court are, how they are appointed, transferred and removed, and what they do after retirement. This book provides an account of these four facets of judicial functioning and analyses the processes in operation today. It argues that each of these four aspects gives rise to significant concerns pertaining to judicial independence, accountability, or both. Its main argument is that both judicial independence and accountability are necessary for 'an effective judiciary', and these two values are not in conflict with each other as is commonly assumed.

**Yearbook of the United Nations 2014 Jan 30 2020** With its comprehensive coverage of political and security matters, human rights issues, economic and social questions, legal issues, and administrative and budgetary matters, the Yearbook of the United Nations stands as the authoritative reference work on the annual activities and concerns of the Organization. Fully indexed, the Yearbook includes all major General Assembly, Security Council and Economic and Social Council resolutions and decisions, uniquely placing them in a narrative context of United Nations consideration, deliberation and action. This sixty-eighth volume presents the work of the United Nations in dealing with recurring conflicts with severe humanitarian consequences including in the Syrian Arab Republic, where more than 12 million people were in need of basic food, clothing and shelter. The volume also highlights the Organization's rapid response to an escalatory global health emergency—the Ebola virus disease outbreak across West Africa. It documents the Organization's coordination of policy discussions to finalize a global sustainable development agenda, with the security of future generations as the core concern; and its efforts to rebuild societies emerging from conflict while keeping the fragile peace in other places. It further details the entry into force of the landmark Arms Trade Treaty, the missile downing of a passenger airliner in the midst of a geopolitical crisis in eastern Ukraine, and securing international human rights and humanitarian law and prosecuting abuses.
