[Shrinkwrap](#) Jul 26 2019 Fundamentals of Corporate Finance, by Richard A. Brealey, Stewart C. Myers and Alan J. Marcus, has been applauded for its modern approach and interesting examples. Professors praise the authors' well-organized and thoughtful writing style and their clear exposition of what many students consider difficult material. The authors accomplish this without sacrificing an up-to-date, technically correct treatment of core topic areas. Since this author team is known for their outstanding research, teaching efforts, and market-leading finance textbooks, it's no surprise that they have created an innovative and market-driven revision that is more student friendly than ever. Every chapter has been reviewed and revised to reflect the current environment in corporate finance.

The Road Before Me Weeps Feb 10 2021 A powerful and revealing firsthand account of the migrant and refugee experience on the overland route across Europe War and chaos in Syria and Iraq, violence in Afghanistan, and hopelessness in countries bordering war zones have spurred several million refugees and migrants to set out for Europe. The West Balkans, from Turkey through Greece, Macedonia, Bulgaria, Serbia, and Hungary, became the main entry route. Based in Budapest for more than three decades, Nick Thorpe was perfectly placed to cover the birth of the route, its

heyday, and the attempts of numerous states to close it. This is his intimate account of the daily lives of those stuck in razor-wire enclosures or on the move along forest tracks, railway lines, motorways--and of the smugglers, border police, and political leaders who help, exploit, or obstruct them. He challenges those who demonize or glorify migration, visits the arrivals in their new environment, and studies their impact on the countries which welcomed them with open arms or hesitation.

Image on the Edge Apr 14 2021 What do they all mean - the lascivious ape, autophagic dragons, pot-bellied heads, harp-playing asses, arse-kissing priests and somersaulting jongleurs to be found protruding from the edges of medieval buildings and in the margins of illuminated manuscripts? Michael Camille explores that riotous realm of marginal art, so often explained away as mere decoration or zany doodles, where resistance to social constraints flourished. Medieval image-makers focused attention on the underside of society, the excluded and the ejected. Peasants, servants, prostitutes and beggars all found their place, along with knights and clerics, engaged in impudent antics in the margins of prayer-books or, as gargoyles, on the outsides of churches. Camille brings us to an understanding of how marginality functioned in medieval culture and shows us just how scandalous, subversive, and amazing the art of the time could be.

Voyaging Under Power, 4th Edition May 16 2021 The passagemaking bible updated to help you live your long-distance voyaging dreams First published in 1975, Robert Beebe's *Voyaging Under Power* revolutionized long-distance cruising, encouraging powerboaters to enjoy what was once exclusive to sailboats and their crews: crossing oceans to exotic, interesting, and beautiful places in comfort with a minimum of problems and expense. Now power-cruising couple Denis and Mary Umstot, whose interest in power voyaging was ignited by Beebe's work, have updated *Voyaging Under Power* for the twenty-first century. The much anticipated *Voyaging Under Power, Fourth Edition*, includes Beebe's original wisdom and philosophy of passagemaking, as well as his groundbreaking thoughts on vessel stability and fuel monitoring. Fourteen new chapters provide insights into a range of additional topics vital for ocean passages and passagemakers, including: Seaworthiness, stability, and other design concepts Options for stabilizing passagemakers including paravanes, active and passive fins, and antiroll tanks Selecting and understanding the critical systems for long-distance voyaging A decision process for choosing a new boat or analyzing the suitability of a used boat An examination of passagemaking models from Nordhavn, Kadey-Krogen, Seahorse, and Dashew, as well as the designs of Stephen Seaton, Michael Kasten, George Buehler, Dave Gerr, and others Highlights of successful and proven passagemakers of the past, including examples from eleven builders and designers First-hand accounts from passagemakers around the globe, including the Mediterranean, Black Sea, South America, South Pacific, Madagascar, and beyond Tips on understanding and predicting weather and waves and what to do in a storm Understanding offshore safety issues, including how to avoid trouble and cross oceans in comfort Choosing and training crew as well as communication tips for a better cruising experience Preparing for and resolving maintenance problems at sea and in distant anchorages "The list of contributors shows the quality of experience in the pages of this fourth edition. Anyone wanting to join, or at least understand the elements of, the long-distance passagemaking lifestyle will find a great deal of knowledge that is realistic, useful, and timely. You'll keep *Voyaging Under Power* on your pilothouse bookshelf (or its electronic equivalent) for years to come." -- Bill Parlatore, Founder of PassageMaker Magazine "Captain Beebe applied Navy experience, technical creativity, and an open mind to his self-appointed task of inventing the long-range power cruiser. He embraced ideas that others discarded as readily as he rejected solutions others found indispensable. His path, like all innovators, was the uncommon one and his selfless sharing in *Voyaging Under Power* literally launched a thousand ships. This Fourth Edition of Beebe's classic draws on new ideas and the accumulated wisdom of today's yacht designers and experienced ocean voyagers to further Beebe's cause and liberate thousands more from the tyranny of dry land." -- Michael Jones, Ocean Traveler, Ship Design Collaborator, and Proud Parent of Google Earth

The Lawyer-Judge Bias in the American Legal System Sep 07 2020 Virtually all American judges are former lawyers. This book argues that these lawyer-judges instinctively favor the legal profession in their decisions and that this bias has far-reaching and deleterious effects on American law. There are many reasons for this bias, some obvious and some subtle. Fundamentally, it occurs because - regardless of political affiliation, race, or gender - every American judge shares a single characteristic: a career as a lawyer. This shared background results in the lawyer-judge bias. The book begins with a theoretical explanation of why judges naturally favor the interests of the legal profession and follows with case law examples from diverse areas, including legal ethics, criminal procedure, constitutional law, torts, evidence, and the business of law. The book closes with a case study of the Enron fiasco, an argument that the lawyer-judge bias has contributed to the overweening complexity of American law, and suggests some possible solutions.

Righteous Porkchop Nov 21 2021 Asked to head up Robert F. Kennedy Jr.'s environmental organization's "hog campaign," Nicolette Hahn Niman embarked upon a fascinating odyssey through the inner workings of the "factory farm" industry. What she discovered transformed her into an intrepid environmental lawyer determined to lock horns with the big business farming establishment. She even, unexpectedly, found love along the way. A searing account of an industry gone awry and one woman's passionate fight to remedy it, *Righteous Porkchop* chronicles Niman's investigation and her determination to organize a national reform movement to fight the shocking practices of industrial animal operations. She offers necessary alternatives, showing how livestock farming can be done in a better way—and she details both why and how to choose meat, poultry, dairy, eggs, and fish from traditionally farmed sources.

Lightning Lost Jul 18 2021 A powerful love unleashes a devastating storm. Thera craved normalcy... a chance to live a life filled with generosity, peace, and love. Greed, and the need for power, consumed the people closest to her, the ones who were supposed to protect her. Presented with the choice to show kindness and strength, to usher in an era of reconciliation and prosperity, the leader of the Roma, Thera's father, choose a selfish, immoral path... one that would plague his people for thousands of years. Elysia's being hunted. Her gift is the key to breaking the Roaming Curse, but others are bound to protect it at all costs. Confused and scared, she'll have to learn from the history of her people in order to save them from annihilation. Loyalties are tested, and she's unsure they are worthy of saving. Her time is running out. The past and present collide, threatening a destruction of catastrophic proportions, not only for the Roma, but also for their Hunters.

Crap CVs Jun 04 2020 Application for Employment I refer to the recent death of the Technical Manager at your company and hereby apply for the replacement of the deceased manager. Each time I apply for a job, I get a reply that there is no vacancy but in this case I have caught you red-handed and you have no excuse because I even attended the funeral to be sure that he was truly dead and buried before applying. Attached to my letter is a copy of my CV and his death certificate.

Crap CVs is a hilarious compilation of the worst job applications imaginable, including overly-honest cover letters, embarrassing typos, mortifying personal revelations, awkward interview questions, misplaced self-confidence, self-aggrandizing gibberish, blatant truth-twisting and, of course, outright lies.

Blockchain Apr 02 2020 Bitcoin is starting to come into its own as a digital currency, but the blockchain technology behind it could prove to be much more significant. This book takes you beyond the currency ("Blockchain 1.0") and smart contracts ("Blockchain 2.0") to demonstrate how the blockchain is in position to become the fifth disruptive computing paradigm after mainframes, PCs, the Internet, and mobile/social networking. Author Melanie Swan, Founder of the Institute for Blockchain Studies, explains that the blockchain is essentially a public ledger with potential as a worldwide, decentralized record for the registration, inventory, and transfer of all assets—not just finances, but property and intangible assets such as votes, software, health data, and ideas. Topics include: Concepts, features, and functionality of Bitcoin and the blockchain Using the blockchain for automated tracking of all digital endeavors Enabling censorship-resistant organizational models Creating a decentralized digital repository to verify identity Possibility of cheaper, more efficient services traditionally provided by nations Blockchain for science: making better use of the data-mining network Personal health record storage, including access to one's own genomic data Open access academic publishing on the blockchain This book is part of an ongoing O'Reilly series. Mastering Bitcoin: Unlocking Digital Crypto-Currencies introduces Bitcoin and describes the technology behind Bitcoin and the blockchain. Blockchain: Blueprint for a New Economy considers theoretical, philosophical, and societal impact of cryptocurrencies and blockchain technologies.
