Constitutional Law in Context Jul 24 2019

Through both historical essays and a timeline of American constitutional history, *Constitutional Law in Context* helps students understand constitutional law in light of cases, doctrine, constitutional analysis, federalism, and historical context. It covers both structure of government and individual liberty cases, and it includes a substantial chapter on free speech. In addition, the book provides historical context for the cases. The casebook helps students to see how historical context shaped doctrinal developments. It also shows how historical developments affecting one doctrine often shaped other doctrines as well. Examples include parallel changes in commerce clause, substantive due process, and equal protection cases, and in cases related to race and gender.

The chapter on incorporation includes excerpts from the Black Codes and from the congressional debates on the Fourteenth Amendment. The incorporation chapter also shows how the framers of the amendment were influenced by denials of civil liberties that occurred during the crusade against slavery. The book contains materials on constitutional decision-making outside of the Supreme Court including materials on the Clinton impeachment and examples from free speech history. By its emphasis on the types of constitutional arguments, *Constitutional Law in Context* is designed to assist students in understanding and formulating constitutional arguments based on text, history, precedent, and policy. To help students understand constitutional doctrine, the book contains short doctrinal essays, charts, and diagrams. It also deals with some state constitutional law cases to remind students that state constitutions may provide independent and sometimes greater protection of rights. This new third edition includes cases decided through the 2009 - 2010 term and several new essays. The authors traditionally provide online supplements each year at no charge.

Contracts Apr 24 2022
Contracts: Cases, Discussion, and Problems, Fourth Edition is known for its strikingly clear, straightforward text that illuminates cases as well as concepts

and theory. The book focuses on modern cases to expose students to contemporary contract law, but it also includes many important or iconic older cases. The cases are set in context by extensive author-written explanatory text. Insightful questions draw attention to difficult and crucial aspects of the law and prompt vigorous class discussion. Numerous problems, ranging from simple to complex, supplement cases and introduce topics taught most effectively through problems. The casebook's traditional organization begins with formation and then corresponds to the sequence followed by the Restatement (2nd) of Contracts and treatises. Its concise, efficient presentation results in an optimum length for the course. Procedural issues are highlighted when presented by the cases and transactional issues such as drafting, client counseling, and negotiation are raised through the use of questions and small exercises throughout the text. Strengthening the text's focus on contemporary methods of contracting, modern issues in standard contracts are explored along with contracts entered into electronically. International and comparative material offers alternative approaches for students to consider, such as those taken by the United Nations Convention on Contracts for the International Sale of Goods (CISG) and the UNIDROIT Principles of International Commercial Contracts.
