Couples That Work Dec 11 2020 Finding fulfillment in both love and work isn't easy--but it's possible. The majority of couples today are dual-career couples. As anyone who's part of such a relationship knows, this presents big challenges: trying to raise kids and achieve career goals while caring for and supporting your partner can seem impossible. Yet most advice for dual-career couples fails, framing the challenges as a zero-sum game in which one partner's gain is the other's loss and solutions feel like sacrifices or unsatisfactory trade-offs. This book is different. In *Couples That Work*, INSEAD professor Jennifer Petriglieri rejects conventional, one-size-fits-all solutions and instead focuses on how dual-career couples can tackle and resolve the challenges they face throughout their lives--together. She identifies three key phases of exploration and personal growth in every couple's work-life journey, showing how partners must navigate these together to strengthen their bond. Each phase is crystallized with a question: How can we make this work? The first phase focuses on the logistics of combining two busy lives and often involves the demands of young children. What do we really want? In the second phase, couples learn to navigate their midlife crises in ways that allow each partner to continue to feel happy and fulfilled. Who are we now? With careers winding down and kids grown up, this last phase offers new freedoms--and uncertainties. Based on a five-year research project, the book includes interviews with couples from over thirty countries--from executives to entrepreneurs and from twentysomething newlyweds to dual-career grandparents. Filled with vivid real-life stories, keen insights, and engaging exercises, *Couples That Work* will help couples develop their own unique answers to that most pressing question: How can we successfully combine love and work?

The Fourth Industrial Revolution Jul 18 2021 World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine "smart factories" in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

Tourism Jan 30 2020 `Argued with a real verve, it makes a plea to rethink the role of tourism in modernity seeing it not as a fleeting and marginal element, but as something enduring, emblematic and constitutive of contemporary society. Tourism is seen as a key element of modern life, not an escape from it' - Mike Crang, Department of Geography, University of Durham Tourism is a rapidly growing area of student enrolment. Lecturers and students who have waited patiently for an up-to-date, lucid and indispensable teaching and research text, need wait no more. This book is a matchless guide to understanding the theory, practice, development and effects of tourism. Tourism: An Introduction: - equips students with a critical perspective of the central processes of tourism and the relationship between tourism and culture - places tourism at the heart of modern life rather than as a peripheral feature added on after work - illuminates the relationship between tourism and nation formation, citizenship, consumerism and globalization - reveals the ritual, performative and embodied dimensions of tourist experience This book offers readers a major synthesis of modern thought on tourism. It breaks the mould of approaching tourism as a self-contained, compartment of contemporary life and treats it as a major and exciting cultural phenomenon. This is a landmark work in the study of tourism. Adrian Franklin is the editor of the acclaimed journal *Tourist Studies* (SAGE Publications).

Reinventing the Local in Tourism Mar 14 2021 This book investigates the way localities are shaped and negotiated through tourism, and explores the emerging success of local peer-produced hospitality and tourism services which are transforming the tourist experience. Tourists are now being brought into much closer contact with locals and have new opportunities to experience the community at their destination. This book examines these place experiences and travel-sharing arrangements that have now spread globally due to the use of social communication platforms such as Airbnb. It analyses the existence of global communities of 'place experts' that are redefining the organisational structures, value systems, market opportunities, affordabilities and geographies in travel and tourism. This volume brings together the work of established tourism scholars as well as early career researchers and is one of the first books to examine the global-local relationship at tourism destinations and the way that the rapidly developing field of peer-to-peer tourism is transforming tourist destinations.

Cultural Tourism Sep 19 2021 Cultural Tourism remains the only book to bridge the gap between cultural tourism and cultural and heritage management. The first edition illustrated how heritage and tourism goals can be integrated in a management and marketing framework to produce sustainable cultural tourism. The current edition takes this further to base the discussion of cultural tourism in the theory and practice of cultural and heritage management (CM and CHM), under the understanding that for tourism to thrive, a balanced approach to the resource base it uses must be maintained. An 'umbrella approach' to cultural tourism represents a unique feature of the book, proposing solutions to achieve an optimal outcome for all sectors. Reflecting the many important developments in the field this new edition has been completely revised and updated in the following ways: • New sections on tangible and intangible cultural heritage and world heritage sites. • Expanded material on cultural tourism product development, the cultural tourism market and consumer behaviour, planning and delivery of exceptional experiences • New case studies throughout drawn from cultural attractions in developing countries such as Southeast Asia, China, South Africa and the Pacific as well as from the developed world, particularly the United States, Britain, Japan, Singapore, Australia and Canada. Written by experts in both tourism and cultural heritage management, this book will enable professionals and students to gain a better understanding of their own and each other's roles in achieving sustainable cultural tourism. Future of Jobs Jun 04 2020 Times are changing and the labor markets are under immense burden from the collective effects of various megatrends. Technological growth and grander incorporation of economies along with global supply chains have been an advantage for several workers armed with high skills and in growing occupations. However, it is a challenge for workers with low or obsolete skills in diminishing zones of employment. Business models that are digitalized hire workers as self-employed instead of standard employees. People seem to be working and living longer, but they experience many job changes and the peril of skills desuetude. Inequalities in both quality of job and earnings have increased in several countries. The depth and pace of digital transformation will probably be shocking. Industrial robots have already stepped in and artificial intelligence is making its advance too. Globalization and technological change predict the great potential for additional developments in labor market performance. But people should be ready for change. A progression of creative annihilation is probably under way, where some chores are either offshored or given to robots. A better world of for jobs cannot be warranted – a lot will be contingent on devising the right policies and institutes in place.

Practices in Intercultural Language Teaching and Learning Nov 29 2019 This volume responds to the growing need for intercultural approaches to teaching and learning languages. The central premise is that the aim of intercultural language teaching and learning is to foster effective communication and effective learning in spaces between cultures in order to prepare learners for global citizenship, but that the corresponding models and methods must emerge from the bottom-up in order to meet the needs of each unique context. The book offers a collection of successful experiences rooted in praxis. It shares the activities, methods, models, and approaches which have been developed within specific contexts. Thus, it offers an example of how to adopt an "intercultural perspective" in teaching and learning. The editors and contributors share the conviction that the experiences detailed here can be informative to the realities of all readers in the same way that their own practices have been informed by others.
