[From Para to Dakar Sep 07 2020](#) "I've realised that when things are really tough and there seems no hope for the future, it's sometimes just Chapter One of a really cool story, and the ending is entirely up to you."Joey Evans has always loved bikes, from his first second-hand Raleigh Strika at the age of six to the powerful off-road machines that became his passion later on in his life. His dream was one day to ride the most gruelling off-road race in the world, the 9000km Dakar Rally. In 2007 his dream was shattered when he broke his back in a racing accident. His spinal cord was crushed, leaving him paralysed from just below his chest. Doctors gave him a 10 per cent chance of ever walking again. Many would have given up and become resigned to life in a wheelchair, but not Joey Evans. Not only would he get back on his feet and walk, but he would also keep his Dakar dream alive. It was a long and painful road to recovery, involving years of intensive rehabilitation and training, but he had the love and support of both family and friends and an incredible amount of determination. Joey shares the many challenges he and his family faced, relating the setbacks, as well as successes, along the way to the Dakar start line. But the start line was only the first goal. His sights were set on reaching the finish line, which he did in 2017, the only South African to do so. From Para to Dakar is so much more than the story of one man reaching the Dakar finish line. It is a story of friendship and respect, compassion and kindness. It is about defying the odds to reach a dream, it is about grit, endurance and raw courage, and it is inspiring in its true heroism.

[Red Tape and White Knuckles Dec 23 2021](#) To most thirty-something women, walking across the street to get a skinny latte and the latest copy of heat in excruciating high heels is an all-terrain task in itself. But Lois Pryce isn't just any woman - nine to five and post-work white wine spritzers have never been her thing. Unafraid of a challenge - having already ridden her motorbike from Alaska to the southernmost tip of South America - she decided she could never be one to settle for a last minute package holiday in Viva Espana. So, she began the kind of adventure most of us could only ever dream of.

[Dreaming Of Jupiter Jan 12 2021](#) Ted Simon is the author of the classic travel book JUPITER'S TRAVELS. It documents his four-year journey round the world by motorbike, travelling through Europe, Africa, South and North America, and Asia. A number one bestseller in the late 1970s, it is still regarded as one of the greatest motorcycle books - indeed, one of the greatest travel books - ever written. In 2001, at the age of 69, Ted Simon decided to retrace his journey, and DREAMING OF JUPITER is the result. It took him two and a half years - during which time he revisited all the countries he had travelled through in the 1970s. He found much had changed, and he reflects upon the increased poverty, political upheavals, environmental issues and indeed the changes in himself. But ultimately, DREAMING OF JUPITER is a hugely inspiring read with a positive message at its heart - that even at the age of 70 you can still set off on an adventure, and be surprised and excited by what life throws at you along the way.

[Motorcycle Messengers Jul 06 2020](#) "Motorcycle Messengers" is a collection of travel stories from some of the leading writers in the genre . . . plus a few people

you've never heard of. Consider it a sample pack of authors. Stuff a copy into your saddlebag, read a story by the fire, and discover your new favourite motorcycle travel writer. Lois Pryce exploits her dead grandmother and an imaginary husband to access the Congo. Neil Peart finds his rhythm through the curves of North Carolina. Geoff Hill breaks a Royal Enfield, falls in love, and becomes a hookah hooligan in Iran. Mark Richardson puts his foot up and makes connections in Rwanda. Christopher P. Baker nearly crashes as he crushes crustaceans in Cuba. Ted Simon ponders humanity while observing a rescue at sea off the coast of Malaysia.

Shaft Alignment Handbook, Third Edition Nov 21 2021 Rotating machinery is the heart of many industrial operations, but many engineers and technicians perform shaft alignment by guesswork or with limited knowledge of the tools and methods available to accurately and effectively align their machinery. Two decades ago, John Piotrowski conferred upon the field an unprecedented tool: the first edition of the Shaft Alignment Handbook. Two editions later, this bestselling handbook is still the most trusted and widely embraced guide in the field. The third edition was reorganized, updated, and expanded to be more convenient, intuitive, and to reflect the latest developments in the area. Dedicated chapters now discuss the basics of alignment modeling, each of the five basic alignment methods, and electro-optic methods. Significant new material reflects recent findings on detecting misalignment, machinery movement from offline to running conditions, multiple element drive trains, and specific information on virtually every type of rotating machinery in existence. Entirely new chapters explore bore and parallel alignment. Providing detailed guidance based on years of hands-on experience, the Shaft Alignment Handbook, Third Edition is a practical tool to help avoid costly shutdowns, dangerous failures, and early replacements.

Lois on the Loose Mar 26 2022 Young and beautiful, Lois Pryce was a rising star at the BBC. Unbeknownst to her co-workers, Lois lived a parallel life as a biker babe with an overwhelming sense of wanderlust. So she packed in her career to ride her motorcycle on her own from the northernmost tip of Alaska to the southernmost tip of South America. Alone. Armed only with the Spanish words for 'caution' and 'cheese', Lois was rather under-prepared for multiple bear sightings, bribing her way through borders, spending a night in a Mexican brothel and crashing her bike in the wilds of Patagonia. She most certainly got the adventure she craved, and her pulse-pounding, soul-searching adventure has already attracted fans worldwide - a weblog that she kept whilst on her travels was receiving more than two-thousand hits a day. Her hilarious, brilliantly written travelog will appeal to anyone who's ever dreamt of jacking-it-all-in and running away to see the world.

Riding High Apr 14 2021 Riding High is packed with untold episodes from the Jupiter journey of Ted Simon's book Jupiter's Travels: his confrontations with a murderous military in Chile, his farcical arrest in India, bizarre customs in Thailand and Malaysia, his hilarious entanglements with a bottle of bad Dubonnet in Ecuador, and many more. Simon contrasts them with the touching and turbulent events that followed his return to domesticity, and explains what became of him in 'life after travel.'

Tunnels and Underground Cities: Engineering and Innovation Meet Archaeology, Architecture and Art Aug 19 2021 Tunnels and Underground Cities: Engineering and Innovation meet Archaeology, Architecture and Art. Volume 10: Strategic use of underground space for resilient cities contains the contributions presented in the eponymous Technical Session during the World Tunnel Congress 2019 (Naples, Italy, 3-9 May 2019). The use of underground space is continuing to grow, due to global urbanization, public demand for efficient transportation, and energy saving, production and distribution. The growing need for space at ground level, along with its continuous value increase and the challenges of energy saving and achieving sustainable development objectives, demand greater and better use of the underground space to ensure that it supports sustainable, resilient and more liveable cities. The contributions cover a wide range of topics, from investing in urban underground space, via effective use of underground space for sustainable cities, and the use of new energy carriers to the compound use of underground space for integrated campus-urban development. The book is a valuable reference text for tunnelling specialists, owners, engineers, archaeologists, architects, artists and others involved in underground planning, design and building around the world, and for academics who are interested in underground constructions and geotechnics.
