*1668* Jun 28 2022 Peter Sahlins's brilliant new book reveals the remarkable and understudied "animal moment" in and around 1668 in which authors (including La Fontaine, whose Fables appeared in that year), anatomists, painters, sculptors, and especially the young Louis XIV turned their attention to nonhuman beings. At the center of the Year of the Animal was the Royal Menagerie in the gardens of Versailles, dominated by exotic and graceful birds. In the remarkable unfolding of his original and sophisticated argument, Sahlins shows how the animal bodies of the menagerie and others (such as the dogs and lambs of the first xenotransfusion experiments) were critical to a dramatic rethinking of governance, nature, and the human. The animals of 1668 helped to shift an entire worldview in France — what Sahlins calls Renaissance humanimalism — toward more modern expressions of Classical naturalism and mechanism. In the wake of 1668 came the debasement of animals and the strengthening of human animality, including in Descartes's animal-machine, highly contested during the Year of the Animal. At the same time, Louis XIV and his intellectual servants used the animals of Versailles to develop and then to transform the symbolic language of French absolutism. Louis XIV came to adopt a model of sovereignty after 1668 where his absolute authority is represented in manifold ways with the bodies of animals and justified by the bestial nature of his human subjects. *1668: The Year of the Animal in France* explores and reproduces the king's animal collections — in printed text, weaving, poetry, and engraving, all seen from a unique interdisciplinary perspective. Sahlins brings the animals of 1668 together and to life as he observes them critically in their native habitats — within the animal palace itself by Louis Le Vau, the paintings and tapestries of Charles Le Brun, the garden installations of André Le Nôtre, the literary work of Charles Perrault and the natural history of his brother Claude, the poetry of Madeleine de Scudéry, the philosophy of René Descartes, the engravings of Sébastien Leclerc, the trans\_fusion experiments of Jean Denis, and others. The author joins the non\_human and human agents of 1668 — panthers and painters, swans and scientists, weasels and weavers — in a learned and sophisticated

treatment that will engage scholars and students of early modern France and Europe and readers broadly interested in the subject of animals in human history.

**Guidance for the Description of Animal Research in Scientific Publications** Jul 26 2019 The publication of research articles involving animal studies is central to many disciplines in science and biomedicine. Effective descriptions in such publications enable researchers to interpret the data, evaluate and replicate findings, and move the science forward. Analyses of published studies with research animals have demonstrated numerous deficiencies in the reporting of details in research methods for animal studies. Considerable variation in the amount of information required by scientific publications and reported by authors undermines this basic scientific principle and results in the unnecessary use of animals and other resources in failed efforts to reproduce study results. Guidance for the Description of Animal Research in Scientific Publications outlines the information that should be included in scientific papers regarding the animal studies to ensure that the study can be replicated. The report urges journal editors to actively promote effective and ethical research by encouraging the provision of sufficient information. Examples of this information include: conditions of housing and husbandry, genetic nomenclature, microbial status, detailed experimental manipulations, and handling and use of pharmaceuticals. Inclusion of this information will enable assessment and interpretation of research findings and advancement of knowledge based on reproducible results.

But every kind of animal, including humans, is enclosed within its own unique sensory bubble, perceiving but a tiny sliver of our immense world. In An Immense World, Ed Yong coaxes us beyond the confines of our own senses, allowing us to perceive the skeins of scent, waves of electromagnetism, and pulses of pressure that surround us. We encounter beetles that are drawn to fires, turtles that can track the Earth’s magnetic fields, fish that fill rivers with electrical messages, and even humans who wield sonar like bats. We discover that a crocodile’s scaly face is as sensitive as a lover’s fingertips, that the eyes of a giant squid evolved to see sparkling whales, that plants thrum with the inaudible songs of courting bugs, and that even simple scallops have complex vision. We learn what bees see in flowers, what songbirds hear in their tunes, and what dogs smell on the street. We listen to stories of pivotal discoveries in the field, while looking ahead at the many mysteries that remain unsolved. Funny, rigorous, and suffused with the joy of discovery, An Immense World takes us on what Marcel Proust called “the only true voyage . . . not to visit strange lands, but to possess other eyes.” FINALIST FOR THE KIRKUS PRIZE • FINALIST FOR THE ANDREW CARNEGIE MEDAL

**Tamed and Untamed** Apr 02 2020 Extraordinary new insights into the minds and lives of our fellow creatures from two of the world's top animal authors, Elizabeth Marshall Thomas and Sy Montgomery. A Mail on Sunday "Critic's Pick" Best Read of the Year "In their writing and in their lives and in their remarkable friendship, Liz and Sy break down false barriers and carry us closer to our fellow creatures."--from the foreword by Vicki Constantine Croke, author of *Elephant Company* *Tamed and Untamed*—a collection of essays penned by two of the world's most celebrated animal writers, Sy Montgomery and Elizabeth Marshall Thomas—explores the minds, lives, and mysteries of animals as diverse as snails, house cats, hawks, sharks, dogs, lions, and even octopuses. Drawing on stories of animals both wild and domestic, the two authors, also best friends, created this book to put humans back into the animal world. The more we learn about what other animals think and do, they explain, the more we understand ourselves as animals, too. Writes Montgomery, "The list of attributes once thought to be unique to our species—from using tools to waging war—is not only rapidly shrinking, but starting to sound less and less impressive when we compare them with other animals' powers." With humor, empathy, and introspection, Montgomery and Thomas look into the lives of all kinds of creatures—from man's best friend to the great white shark—and examine the ways we connect with our fellow species. Both authors have devoted their lives to sharing the animal kingdom's magic with others, and their combined wisdom is an indispensable contribution to the field of animal literature. The book contains a foreword by Vicki Constantine Croke, author of the bestseller *Elephant Company*.

**The Serpent and the Swan** Sep 27 2019 *The Serpent and the Swan* is a history and analysis of animal bride tales from antiquity to the present. The animal bride tale, the author argues, is an enduring expression of humankind's need to remain close to and a part of nature. Boria Sax traces the idea of the animal bride through history by drawing upon legends and literary works from throughout the world. He pays particular attention to Eurasian sources which support his thesis that the animal bride theme originated among the serpent cults of Mesopotamia and southeastern Europe. Through time, the details of the animal bride theme changed as a result of mankind's changing perceptions of the natural world. In general, this study is an account of myths and beliefs that have surrounded animals--and women--during the rise of modern humankind. *The Serpent and the Swan* identifies and explains images of the animal bride that pervade, enliven, and enrich our culture. The bride becomes Eve taking an apple from the serpent, Medea casting spells, Cinderella riding to the royal ball in a pumpkin coach, and the Little Mermaid rising from the waves. The Author: Boria Sax, who holds a doctorate in German and intellectual history, is the author of *The Frog King* and *The Parliament of Animals*, among other books.
